

Midterm Exam For Itt Tech

randomized controlled trial (RCT) is a type of study design used to evaluate the effectiveness of a treatment or intervention. It involves comparing a group receiving the intervention (experimental group) with a group receiving a placebo or standard treatment (control group). The study is typically conducted over a period of time, and the results are analyzed to determine if the intervention is effective. The analysis often involves statistical methods to account for randomization and control for confounding factors. The results are often presented in a paper or report, such as a systematic review or meta-analysis, which summarizes the findings of multiple studies. The results of these studies can be used to inform clinical practice and public health policies.
